

# Commercial Vehicle Air Spring Catalogue

*3rd Edition*

# Contents

Introduction / 1

Air Spring Components / 2

Air Spring Styles & Identification / 3

Bus Air Springs / 4

Towing vehicle & Trailer & Semitrailer Air Springs / 11

Driver's Cab & Seat Air Springs / 58

Problems, Causes & Solutions / 60

Preventive Maintenance of Air Springs / 63

# A driving experience that makes every trip a pleasure!

## QUALITY

Air springs appear simple, yet they are actually a highly sophisticated and complex product.

Wherever you are, Fengmao air springs are built to meet the most exacting standards. We have more than three decades of experience working with high-strength fabrics and rubber compounds, and the rubber formulations are optimized to enable us to provide you with air springs that are built to last. For your confidence, Fengmao air springs are manufactured according to OEM standards and rigorously tested. Adhering to a quality policy of "Always be responsible for the brand and always satisfy our customers", experience effortless security in purchasing and usage of our products.

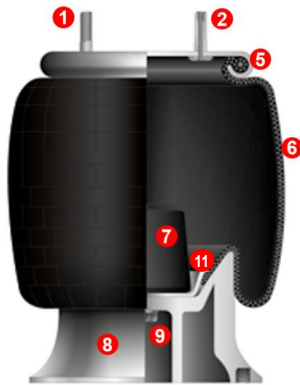

## RELIABILITY

Quality is the lifeblood of our enterprise, and our products are always consistent whether they are for the OEM or aftermarket. In fact, our air springs often outlast other maintenance components of the suspension system. We have the industry's first-class manufacturing equipment, advanced manufacturing process, under the control of a perfect quality management system, to provide a guarantee for the durability and quality of our products. Wherever your journey takes you, Fengmao Air Springs ensure a seamless journey.

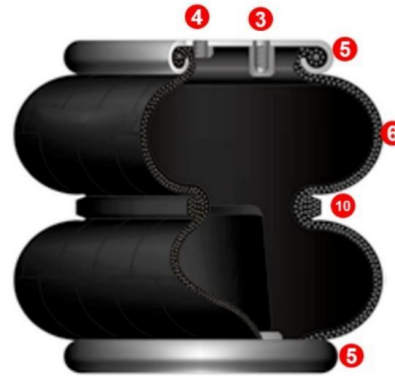

## SERVICE

We take pride not just in our highquality products, but also in our service to our customers and the industry. We are dedicated to providing the best service to our customers and the market. Our mission is to provide our distributors and end customers with training and product identification assistance, such as this application guide, as well as any other replacement needs. Fengmao is your reliable partner.

## Rolling Spring

## Convolute Spring

### 1. Stud

A permanent part of the bead plate assembly, used to attach the air spring to the suspension.

### 2. Combo Stud

Combination mounting stud and air fitting.

### 3. Blind Nut

A permanent part of the bead plate assembly, used to attach the air spring to the suspension.

### 4. Air Fitting Hole

A tapped hole that provides an air entrance for the part.

### 5. Bead Plate

Steel plate, permanently crimped to the bellows to form an airtight assembly.

### 6. Bellows

The air spring bellows is a flexible, airtight composite of rubber and reinforced fabric, which allows the assembly to roll up and down, providing an air-cushioned spring effect within the suspension.

### 7. Bumper (Optional)

A solid, molded rubber fail-safe device used on many suspension applications. Prevents excessive damage to vehicle and suspension in the case of sudden air pressure loss.

### 8. Piston

The piston of sleeve air spring made from aluminum, steel, or fiber reinforced composite. Provides lower mounting arrangement for the air spring in the form of tapped holes or studs.

### 9. Piston Bolt

Attaches the piston to the bellows assembly. Extended on the bottom of the piston, in some cases, to serve as a means of attaching the spring to the suspension.

### 10. Girdle Hoop

A ring molded into the bellows of the convoluted type air spring.

### 11. End Closure

Steel plate, formed by vulcanisation with the bellow to form an airtight assembly and connected to the piston.

Piston: Steel **8**

## 1. Bellows Number

Identifies the bellows, normally molded directly to the right of the Fengmao logo “FED”.

## 2. Assembly Order Number

Located on the label adhered to the bead plate. This number is used for ordering purposes.

## 3. Replacement Product Number

Competitor item numbers to make replacement products easy to find.

## 4. Cross Section View

Includes dimensional information in millimeter for uninflated diameter, maximum height, and collapsed height.

## 5. Bead Plate Top View

Identifies dimensional information in millimeter, mounting attachments.

## 6. Piston Bottom View

Includes dimensional information in millimeter, mounting attachments.

## 7. Applications

Vehicle and suspension manufacturers’ part numbers for the particular Fengmao spring.

## 8. Piston

Aluminum, Steel, or Composite.

## 9. Fengmao logo “FED”

## 10. Bellows diameter (uninflated)

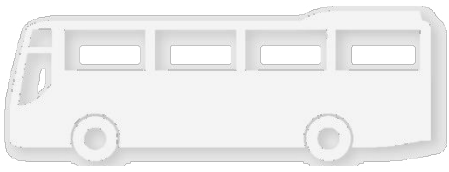

## 11. Bead plate diameter

## 12. Height (uninflated)

Maximum extended & Minimum collapsed

## 13. Piston diameter

## 14. Manufacturing date

### PREVENTIVE MAINTENANCE PROCESS FOR AIR SPRING

THE FOLLOWING ITEMS CAN BE ASSESSED WHEN THE VEHICLE IS UNDERGOING PERIODIC OR PREVENTIVE MAINTENANCE.

**CAUTION:** Never service the air suspension when the air bags are inflated.

- 01** Inspect the outer surface of the bag. Look for signs of uneven wear or cracks due to heating.
- 02** Inspect the compressed air hoses to make sure there is no contact between them and the outer surface of the spring. Air hoses can cause (due to friction) wear on the bellows in a short space of time.
- 03** Check that there is sufficient clearance around the air spring when it is at its maximum diameter, avoiding contact with other metal components.
- 04** Inspect the external surface of the base piston for the external surface of the base piston to check for any build-up of material (e.g. stones, sand, earth, etc.). In a cylindrical spring, the base piston is the lower component under which the bag acts.
- 05** The correct height of the chassis must be maintained. All vehicles with air suspension have the correct chassis height specified by the manufacturer. This height must be maintained within a specified tolerance. This dimension can be inspected with the vehicle loaded or empty.
- 06** Levelling control valves are very important and ensure that the system as a whole works as designed. Clean, inspect and replace if necessary.
- 07** Make sure the vehicle is equipped with suitable shock absorbers, and check for leaking hydraulic fluid or broken and/or damaged connectors. If you find any broken shock absorbers, replace them immediately. The shock absorber normally limits the action of the air spring, preventing the spring from disengaging due to excessive opening.
- 08** Check the torque of all the bolts and nuts used to assemble the air suspension system. If they are inadequate, retighten them according to the manufacturer's specifications, without over-tightening. Information on the appropriate torque can be found on the Firestone product label.
- 09** For cleaning, we recommend using soap and water, methyl, ethyl or isopropyl alcohol. Do not use organic solvents, abrasives or a cleaning system that uses pressurised steam.

This inspection process can be carried out in just a few minutes. If any of the conditions listed above are found, take the appropriate corrective action; this will save time and money.
